

## Developing GUI Application Using PHP

### Ex.9b Inventory Management

1. start Apache and MySql in xampp
2. Type the code in the notepad and save the file in double code "aa.php"
3. create the database employee in mysql
4. create the table product in mysql  
**create table product(pid integer(4),pname varchar(20),price integer(4));**
5. <https://localhost/product.php> and <http://localhost/conn2.php>
6. paste the above files in htdocs in xampp

#### product.php

```
<!DOCTYPE HTML>
```

```
<html>
```

```
<head>
```

```
<title>Product Table</title>
```

```
<!--<link rel="stylesheet" type="text/css" href="style.css"> -->
```

```
<style>
```

```
body {background-color: lightred;}
```

```
h1 {color: blue;}
```

```
p {color: lightgreen;}
```

```
</style>
```

```
</head>
```

```
<body>
```

```
<h1>
```

```
<div id="Pid"> <h3>Product Table </h3>
</h1>
<p>
<h3>
<form method="POST" action="conn2.php">
Pid <br><input type="text" name="pid"><br>
Pname<br><input type="text" name="pname"><br>
Price<br><input type="text" name="price"><br>
<input type="submit" value="ok">
</h3>
</p>
</form>
</div>
</body>
</html>
```

conn2.php

```
<?php
$bg_color = '#ffff00'; // Red background color.
echo "<body style='background-color: $bg_color;'>";
$servername = "localhost";
$username = "root";
$password = "";
```

```
$dbname = "employee";
```

```
// Create connection
```

```
$conn = new mysqli($servername, $username, $password,$dbname);
```

```
// Check connection
```

```
if ($conn->connect_error) {
```

```
    die("Connection failed: " . $conn->connect_error);
```

```
}
```

```
echo "<h3><b>Connected successfully</b></h3>";
```

```
//displaying the contents
```

```
$sql="desc product";
```

```
if($conn->query($sql)==TRUE)
```

```
{
```

```
echo "<br>";
```

```
    echo "<h3><b>Connected to the table</b></h3>";
```

```
}
```

```
else
```

```
{echo "error";}
```

```
//Displaying the contents
```

```
echo "<br>";
```

```
//insertion from html
```

```
$pid=$_POST['pid'];
```

```
$pname=$_POST['pname'];
```

```
$price=$_POST['price'];
```

```
$sql11="insert into product values($pid,$pname,$price)";
```

```
if($conn->query($sql11)==TRUE)
```

```
{echo "<b><h3>Inserted</b></h3>";}
```

```
else
```

```
{echo "error";}
```

```
echo "<br>";
```

```
$sql1="select * from product";
```

```
$result = $conn->query($sql1);
```

```
if ($result->num_rows > 0) {
```

```
    // output data of each row
```

```
echo "<b><h3><font color=blue> pid  pname  price
```

```
</h3></b><br></font>";
```

```
    while($row = $result->fetch_assoc()) {
```

```
        echo $row["pid"]."  ". $row["pname"]."  ".$row["price"]."  <br>";
```

```
    }
```

```
} else {
```

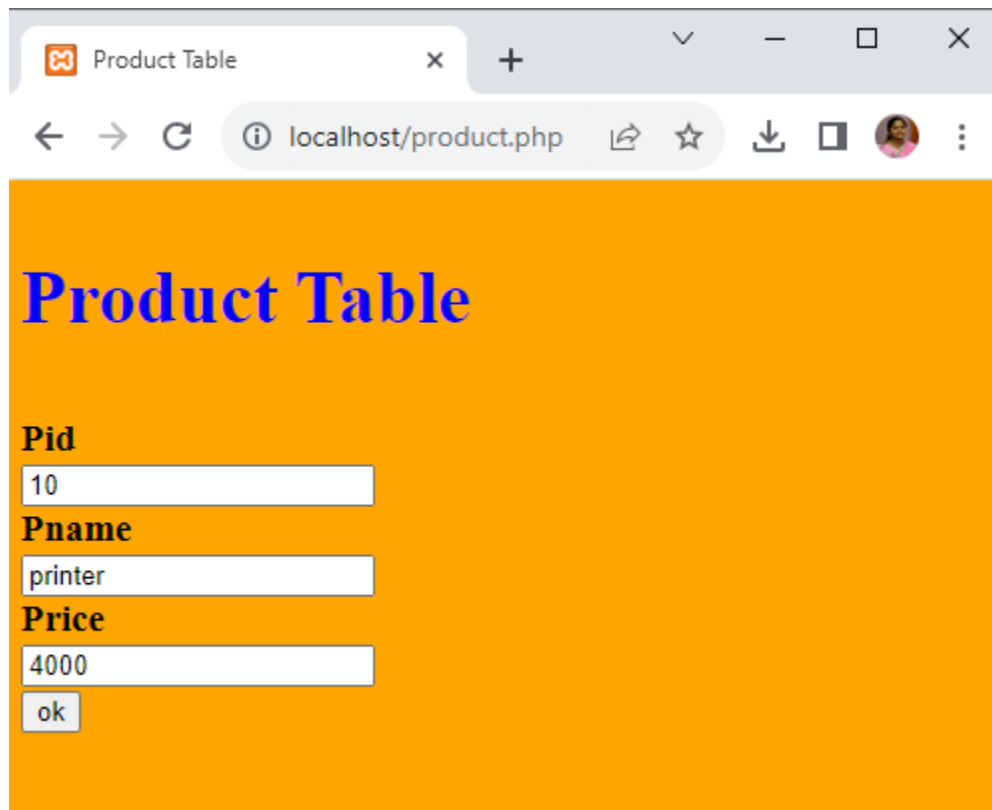

```
    echo "product table";
```

```
}
```

```
$conn->close();
```

```
?>
```

## Output

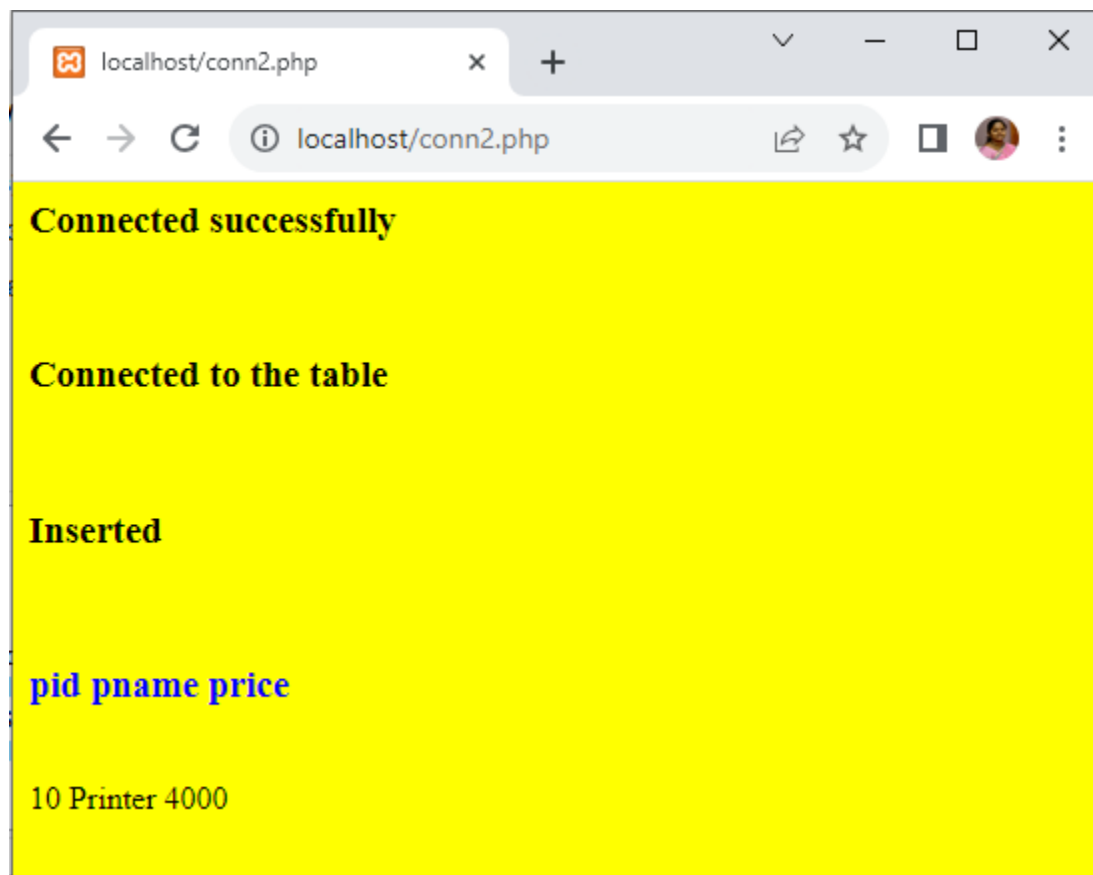

Product Table

Pid  
10

Pname  
printer

Price  
4000

ok

localhost/conn2.php

Connected successfully

Connected to the table

Inserted

| pid | pname   | price |
|-----|---------|-------|
| 10  | Printer | 4000  |
